

JANUARY 2026

ELIZABETH MOIR SCHOOL

WE MOVED!

Elizabeth Moir School moved into new 363-perch (2 ¼ acre) premises at 7, Kirimandala Mawatha in September 2025. The central location within the city limits is convenient for families living in any area of Colombo, close to popular apartment complexes and next to two hospitals. The site is double the combined area of our previous Junior and Senior School premises, with five times more indoor space.

-

ACADEMIC FACILITIES

Children learn in bright, spacious classrooms that provide ample space for movement and creativity. Junior School classrooms are all over 550 square feet (more than 50 m²) and classrooms in the Senior School are more than 600 square feet. All classrooms are air-conditioned and have multimedia projectors to enable teachers to use interactive presentations and videos during lessons.

The Junior School Library provides a warm, colourful and welcoming environment to promote children's love of reading through attractive displays of books and comfortable nooks for students to settle in and read. The Senior Library provides workspaces for over 80 students to work independently as well as areas for them to sit to read. There are plug points for students' laptops and students can access Wi-Fi throughout the school.

There are two large Computer Rooms at the Senior School and one at the Junior School. Each has 25 new Lenovo ThinkCentre desktops with 24" ThinkVision monitors. There is a third Computer Room in the Senior School designed for students to take on-screen exams on laptops.

There are 8 large Physics, Chemistry and Biology laboratories (over 1250 square feet each) in the Senior School, all with new, custom-built lab benches, separate areas for teaching and space for 24 students to conduct individual practical work. All three Chemistry laboratories have new fume cupboards. Sensors to detect gas leaks and emergency gas shut-off buttons ensure student safety. The Junior School Science Laboratory is designed to spark students' curiosity, providing an environment where children can conduct more hands-on experiments and make science truly come alive.

A Robotics & Innovation Lab provides space and equipment for our award-winning Robotics team to design, build and test robots. The Discovery Room in the Junior School stimulates our youngest students' development through a range of sensory experiences.

CREATIVE & PERFORMING ARTS

Large open-plan Art Studios in both Junior and Senior School provide space for our budding artists to explore their creativity. There are also separate Music and Drama Rooms in both schools, accommodating lessons as well as providing rehearsal spaces for productions.

The Dance Studio in the Senior School has a mirror wall and sprung wooden floor to provide support for our dancers. The Junior School Cookery Room is already enabling young chefs to make an array of enticing savoury meals and sweet treats.

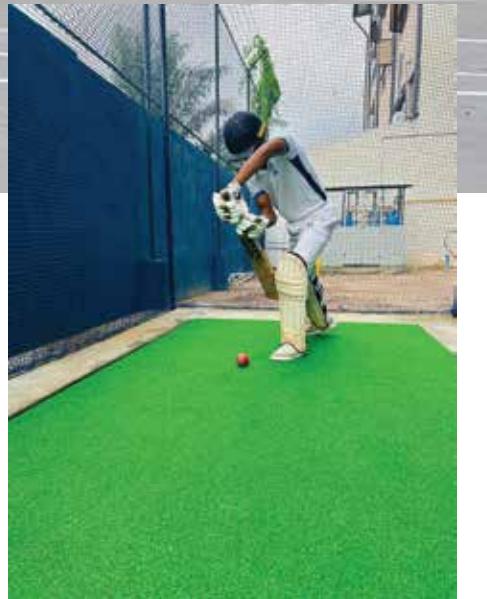

SPORTS

The premises were designed to provide as much space as possible for sport to provide world-class facilities for our teams. Two full-size Basketball courts enable different squads to train at the same time. Both courts have FIBA standard Basketball hoops. The indoor court also has an electronic scoreboard and four FIBA-approved hoops on the sides of the court so players can practise at the same time, without having to line up to shoot.

A 50 x 35m Football pitch will be used for training by all our Football teams as well as being large enough for matches for younger teams. Two cricket nets will enable our Cricket team to maintain its rapid current improvement.

A 25m swimming pool will be completed by the start of next academic year, to be used by both our Junior and Senior Squads, as well as Junior School Swimming lessons. By then, almost all sports practices will take place in school, instead of a lot of time being wasted taking students out of school.

A Pickleball court and Table Tennis table complete the facilities available.

SCHOOL LIFE

Morning Assembly remains at the centre of school life at both the Junior and Senior School. The new Assembly area provides covered seating for over 500 students, teachers and parents, along with a top-of-the range sound system.

The Junior School has separate Infant and Junior play areas with brand new equipment and rubber matting to keep them safe. Senior School students have access to a canteen operated by Tasty Caterers with an attractive covered outdoor seating area.

The Wellbeing Centre provides a welcoming environment for Senior School students to relax, in a supervised space, with games and comfortable seating, or speak to the Guidance Counsellor or one of the Student Counsellors in private.
